timeacle iPad Printing station Guide

You need:
iPad incl. Apple ID
LAN cable
Lightning to USB cable (not USB-C)
Star Printer Model (mCP31L, mCP31LB, mCP21LB)

LAN configuration

1) Connect the printer to the power source with the dedicated power cable
2) Connect your network with the printer using the LAN cable
3) Connect your iPad to the printer at the dedicated iPad port using the lightning-USB cable (image1)
   a. Your iPad will receive power and LAN internet.
   b. To verify that it works:
      i. Your iPad should have an 'Ethernet' option in the Settings App near the WLAN option, where you can also configure IP and DNS settings.
      ii. Your iPad should have internet access now, try Safari or the timeacle PS app and check for internet connectivity.
      iii. In case there is no Ethernet option and no connectivity, you need to enable the printer function "SteadyLAN".
         1. Follow this guide to enable SteadyLAN. (Step 5)
         2. Guide: https://www.star-m.jp/products/s_print/mcprint3/manual/en/settings/SteadyLAN.htm
      iv. In case there is no option for SteadyLAN, you need to update the printer firmware. (Step 5).

How to connect the printer to the timeacle PS App

- If you are already logged in, start with step 1.
- If this is the first time you are using the app, please log in.
- To log in you will need a timeacle Printing Station License. To setup your available licenses please visit https://timeacle.com/customer/printingstation
    - Login with your Admin Account if asked.
    - Configure your license by setting an email and password.
    - Use these credentials to login in the App.
- After logging in you will see the Settings screen, continue from Step 4.

1) While the timeacle PS App is running and logged in, Tap 5 times on the timeacle Logo (bottom right)
2) Use your PIN in the prompt to open the settings menu (the default PIN is 0000)
3) Choose Settings
4) Find the Printer menu and complete the setup by selecting the correct options
5) Optionally, you can select Sample Print Start to check if everything is working as expected.

How to enable iPad Kiosk Mode (Guided Access)

1) Download and install the timeacle PS App from the App Store if not already installed.
2) Open the Settings App on the iPad
3) In the Settings App, navigate to: Accessibility -> Guided Access and turn it ON
    a. After turning it ON, the option "Display Auto-Lock" will appear.
    b. Click it and choose "Never"
4) Open the timeacle PS App
5) Triple-Click the Home Button or on newer iPad models the Top button
    a. Button Guide (https://support.apple.com/en-gb/HT210976)
6) The Guided Access Interface should appear, press Start
7) Set your passcode to finish the setup
    a. Do not forget the passcode. You need it to disable Guided Access again.

How to disable iPad Kiosk Mode (Guided Access)

1) Triple-Click the Home or Top button and enter your Passcode
2) You can now choose "End" to disable the guided access
3) You can now press Home or Swipe up to close the timeacle PS App

How to update the timeacle PS App

1) If Guided Access is enabled, please disable it.
2) Close the timeacle PS App if it is running and open the App Store.
3) Click on the Profile Icon in the Top Right Corner
4) Find the timeacle PS App in the list and click "Update"
5) After the update finished, open the timeacle PS App and enable Guided Access again.

How to log out of the timeacle PS App

1) While the timeacle PS App is running and logged in, Tap 5 times on the timeacle Logo (bottom right)
2) Use your PIN in the prompt to open the settings menu (the default PIN is 0000)
3) Choose "Log out"
